TECHNICAL SKILLS

FRONTEND

React.js HTML5 CSS3
jQuery Bootstrap

BACKEND

Node.js PHP REST APIs

DATABASE

MySQL Query Optimization
Indexing

TOOLS & PLATFORMS

Firebase Redis Socket.io
Git

DSA

Solved **300+ problems** across Arrays, Trees, Graphs, and Dynamic Programming on competitive platforms.

EDUCATION

B.Tech – Computer Science
Chandigarh University

STRENGTHS

System Design API Optimization
Real-Time Systems Problem Solving
Agile / Scrum Code Review

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable healthcare and real-time systems handling 1,000+ daily transactions. Specialized in React.js and Node.js with strong expertise in API performance optimization, system design, and real-time architectures. Proven ability to reduce latency, migrate legacy systems, and deliver production-grade applications on tight deadlines.

EXPERIENCE

Software Developer – Medicovert Hospitals

Jan 2024 – Present

Hyderabad, India

- Built scalable hospital management system using modular React.js + Node.js architecture handling 1,000+ daily transactions.
- Designed billing automation pipeline reducing manual workload by ~40% and improving overall operational efficiency.
- Optimized 5+ critical MySQL queries using indexing and query restructuring, reducing average API response time by ~30%.
- Migrated legacy PHP monolith to a modern Node.js architecture, improving maintainability and deployment speed.
- Developed real-time push notification system using Firebase FCM integrated with background workers.
- Owned end-to-end feature lifecycle — from requirement analysis and design to testing and production deployment.
- Collaborated with cross-functional teams including doctors, admins, and QA to translate clinical workflows into features.

PROJECTS

Real-Time Notification System

Firebase FCM · Node.js · Service Workers

Token-based push notification system with background workers ensuring reliable real-time alert delivery across web and mobile clients.

Hospital Management System

PHP · MySQL · JavaScript

End-to-end HMS covering billing, reporting, and patient workflows with optimized DB queries and role-based access control.

Patient Portal Dashboard

React.js · Node.js · REST APIs

Secure patient-facing portal for accessing lab reports and medical history with OTP-based authentication and responsive UI.

Real-Time Chat Application

Socket.io · Firebase · Node.js

Bidirectional messaging system with live updates, typing indicators, persistent chat storage, and user presence tracking.
